SELECTED EXPERIENCE (Accenture, 9 Years)

Current project: Banking domain- Test Associate Manager (Team size: 16 QA)- BNZ (Bank of New Zealand) [Jan 2022-till date]

- Currently Leading the 2 pods and managing end-to-end deliverables using Accenture's delivery methods for seamless execution. Led QA representation in QBR sessions for Financial Close Tribes.
- Ownership of test planning, test estimation, Automation coverage, and traceability matrix, ensured that projects were delivered within the timeline, and guided testing teams in applying best practices.
- Impact on project:** Increase test automation coverage from 75% to ~88%. Used different tools on each pods.

Pod 1: Tech used: GitHub copilot, Playwright, Typescript, Java, Jenkins | Application: TFO | Domain: Wholesale banking

- (UI Specific) Designed the UI automation by using Playwright with typescript.**
- API Integration Testing:** Developed automated tests by using Rest Assured, and BDD cucumber framework for API integrations between Salesforce and external systems, ensuring data integrity and system reliability.
- Manual testing performed on SAP S/4HANA, and FI modules. seamless implementation of finance processes, specifically Accounts Payable and Receivables

Pod 2: Tech used: Jest-Supertest, Typescript, Splunk, Jenkins | Application: General insurance API | Domain: Insurance

- (API Specific) Worked the jest-Supertest based framework along with typescript.**
- Automated the API's along with AWS DynamoDB validation and CloudWatch logs validation.

Pod 3: Tech used: Selenium, java, Rest assured, Playwright, java, Jenkins | Application: Salesforce

- (Salesforce specific) Framework Development:** Architected and implemented scalable test automation frameworks tailored for Salesforce applications, enhancing test efficiency and coverage.
- API Automation:** Led the development of API automation strategies using Rest Assured, resulting in a significant reduction in manual testing efforts.
- Cross-Cloud Expertise:** Managed test automation projects across multiple Salesforce clouds, ensuring seamless integration and functionality.
- Playwright Automation:** Done Migration from Selenium to Playwright for faster execution and automation of test cases.

Banking domain- Test lead in Commerzbank, Frankfurt Germany [Jan 2020-Dec 2021]

- Automated Mobile Apps with TDD (Appium & Java):** Led mobile app automation initiatives using Appium and a Java-based BDD framework, TestNG, Jenkins and ensuring robust and maintainable test suites.
- Worked on SEPA (Payments), GPPIP (Instant), GPPHC (High Care)GPPMP (mass payments) and SWIFT Gateway.**
- Knowledge Catalyst:** Actively fostered knowledge sharing within the team by conducting mobile app automation training sessions.
- Impact on project:** Increased automation test coverage from 20% to ~64%. Worked directly at client site in Frankfurt, Germany to mitigate high-priority real-time incidents.

- **Certifications/Achievements, Total exp :**

Role	Org	Duration
Associate QA Manager	Accenture, Pune (India)	Oct 2015-till date
Senior QA (level-1)	eInfochips(Ahmedabad)	Jan 2013-Oct 2015
QA Eng.	AMD, Hyderabad	Oct 2011-Nov 2012
QA Analyst(contract role)	EA Games, Hyderabad	May 2010-Oct 2011

Roles and Responsibilities

- Good knowledge of cloud technology and migrating the test code from the on-premise platform to the cloud.
- Sound knowledge of third-party tools called **Saucelabs, Lamdatest**.
- Creating a comprehensive test strategy and test plan that outlines the testing objectives, scope, and approach, defining test environments, test schedules, resource allocations, and test deliverables.
- Creating and providing the dashboard to clients (especially APAC and UK regions) by using **Power BI** and **MS Excel**.
- Building and leading the team of QA, assigning tasks, and managing their workloads, providing guidance and mentoring to the team members, and promoting collaborative and productive work environments.
- Estimating the testing efforts, resources, and budget required for the project.
- Establishing appropriate test metrics, and KPIs to measure the effectiveness and efficiency of the testing process.

e-Commerce domain (B2B) Test lead in Adidas and Dyson project [April 2019-December 2020]

- Enterprise application automation by using selenium with Python. API testing by Rest assured with java.
- **Led a team of 10 people**, providing guidance and direction to achieve goals. **Automated critical 316 P1 test cases out of 515 within this duration. Used Azure devops for test cases, User stories, and Automation pipeline.**
- **Impact on project:** Understood B2B concepts. Applied more Selenium action classes to automate.

Public domain- Test lead in UK Govt Based project (Remove illegal immigrants) [Dec 2018- April 2021]

- **Impact on project:** Learned AWS concepts and completed certification. Learned advanced BDD concepts.
- Designed and implemented the cucumber (BDD) with testing automation framework, using selenium webdriver, TestNG, POM, Allure reporting, and docker and Kubernetes on AWS environment.
- Successfully worked on the customization of the Automation framework using the concepts of cucumber-Google guice dependency injection, JAVA 8/11.
- Migration of test execution to AWS, and using S3 bucket, docker, and Kubernetes.
- Mainly involved in test merges, towards the complex environment and POC for supporting other vendors.
- Experience in Postgres database. Good experience in handling SQL queries.
- Ownership of test planning, test estimation, and traceability matrix, ensured that projects were delivered within the timeline, and guided testing teams in applying best practices.
- Implementing (with devops team) the CI-CD using Bitbucket, Maven, and Jenkins as part of the daily deliverables.

SELECTED EXPERIENCE (eInfochips- Jan 2013 to Oct 2015)

QA Engineer (level-1)

- DirectBuy (leading USA based e-commerce test automation by using selenium and java.
- Manual testing of Salesforce, Desktop application and Hardware devices/embedded devices.

SELECTED EXPERIENCE (EA Games and AMD- May 2010 to Nov 2012)

QA Tester

- Mobile Game tester on J2ME devices and Apple devices (iPhone and iPads)
- AMD developed GPU Tester (functional and performance tester)

Managerial skills

- One of the Lead Mentors for new joiners in Accenture India DU.
- Experience in identifying and analyzing the risks and their potential business impact to determine proper prioritization of the testing activities.
- Having experience of 2 years as a scrum master. Strong experience in creating Kanban board, Metrix, dashboards in **JIRA, Confluence, TFS**, test case management tools, and version management software.
- Experienced QA Lead on-shore and off-shore teams, including hiring, mentoring, and performance appraisals.
- Support to manager for creating the RFP documents.
- **Actively involved in CSR activities, NGO donations, women empowerment, and supporting the LGBTIQ+ community in workplaces, along with Fun activities in the team.**
